-!- FUNCTION: VARIANT HISTONES H2A ARE SYNTHESIZED THROUGHOUT THE CELL CYCLE AND ARE VERY DIFFERENT FROM CLASSICAL S-PHASE RECULATED H2A. THE EXACT FUNCTION OF VARIANT HISTONES H2A IS NOT KNOWN.

-!- SUBUNIT: The nucleosome is an octamer containing two molecules each of H2A, H2B, H3B H3 and H4. The octamer wraps approximately 146
Strongylocentrotus purpuratus (Purple sea urchin).

Dalton From the intron-containing chicken histone H2A.F gene is not S-phase regulated.";
Nucleic Acids Res. 17:1745-1756(1989).
-! FUNCTION: VARIANT HISTONES H2A ARE SYNTHESIZED THROUGHOUT THE CELL CYCLE AND ARE VERY DIFFERENT FROM CLASSICAL S-FHASE REGULATED H2A. THE EXACT FUNCTION OF VARIANT HISTONES H2A IS NOT KNOWN.
-! SUBUNIT: The nucleosome is an octamer containing two molecules each of H2A, H2B, H3 and H4. The octamer wraps approximately 146
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  EMBL; V00414; CAA23705.1; -.

Submitted (OCT-1996) to the EMBL/GenBank/DDBJ databases.
-!- FINCTION: VARIANT HISTONES H2A ARE SYNTHESIZED THROUGHOUT THE
CELL CYCLE AND ARE VERY DIFFERENT FROM CLASSICAL S-PHASE REGULATED
H2A. THE EXACT FUNCTION OF VARIANT HISTONES H2A IS NOT KNOWN.
-!- SUBUNIT: The nucleosome is an octamer containing two molecules
each of H2A, H2B, H3 and H4. The octamer wraps approximately 146
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    cnromosomal protein; Nucleosome core; Nuclear protein; DNA-binding; Multigene family; 3D-structure.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               ö

Proc. Natl. Acad. Sci. U.S.A. 99:14427 (2002)

- I- FUNCTION: This protein binds directly to 23s ribosomal RNA and is necessary for the in vitro assembly process of the 50s ribosomal subunit. It is not involved in the protein synthesizing functions of that subunit (By similarity)

- I- SIMILARITY: BELONGS TO THE L20P FAMILY OF RIBOSOMAL PROTEINS.
                                                                                                                               Bacteria, Actinobacteria, Actinobacteridae, Bifidobacteriales;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Sequence 8, p
